Technical Skills

HTML, CSS, JavaScript, Git, GitHub, SQL, SQLite, Canva, MS-Excel, MS-PowerPoint

EDUCATION

C. V. Raman College Of Engineering	January 2023 - June 2027
B.Tech - Computer Science & Engineering	CGPA: 8.23/10
Motilal Nehru Public School, Jind	2023
Senior Secondary (XII) - Science	Percentage: 68.00%
VIVEKANANDA ENGLISH HIGH SCHOOL	2021
Secondary (X)	Percentage: 86.80%

WORK EXPERIENCE

Full Stack Development Internship	May 2025 - June 2025
TATA STEEL UISL	Jamshedpur
- Built and maintained web-based applications using Flask and Python to streamline tax calculation processes. - Led the development of secure user authentication and role-based access control systems. - Drove the automation of tax report generation and data management to enhance user experience. - Conceptualized and implemented responsive UI components for seamless interaction across devices.	

ACADEMIC PROJECTS

TAX REGIME	May 2025 - June 2025
- Developed a web-based Tax Regime Management System using Flask and Python to simplify income tax calculations and user management. - The system features secure authentication, role-based access control, and automated tax report generation, providing a seamless and efficient tax management experience. - Built and maintained core tax calculation logic and user authentication modules. - Led the implementation of role-based access control to differentiate admin and regular user functionalities. - Drove the development of responsive UI components using Flask templates for enhanced user experience. - Conceptualized and automated detailed tax report generation to streamline user tax management.	
Ocean Odyssey	December 2024 - January 2025
- Ocean Odyssey is an immersive web platform designed to explore the vast and mysterious world of the ocean. - It offers users an engaging experience through interactive sections such as virtual dives, marine life encyclopedias, ocean facts, conservation information, and ocean myths. - The platform combines rich multimedia content, animations, and smooth navigation to educate and inspire marine enthusiasts, students, and conservationists. - Developed interactive and animated user interface features using JavaScript, including smooth scrolling, hover effects, and dynamic content population. - Implemented engaging visual effects such as floating bubbles, water ripples, particle animations, and a fish cursor to enhance user experience. - Enhanced site navigation with a responsive sidebar menu and scroll-based header effects for improved usability.
